

## **FOR IMMEDIATE RELEASE**

### **Industrial manufacturing leaders combine to create the new NOV Mono**

Houston, April 20, 2013 — NOV and Robbins & Myers today announced the formation of Houston-based NOV Mono, as a result of the completion of the previously announced merger between the two companies. The merger positions the combined company as the global leader in industrial pump technology, offering a broad portfolio of products and services to help global firms improve production, reliability and profitability.

The new NOV Mono organization is the world's largest designer and manufacturer of progressing cavity pumps, grinders, screens, parts and packaged solutions to firms across a variety of industrial applications. Industries served include water and waste water, pulp and paper, specialty chemicals, pharmaceutical, food and beverage, mining and mineral processing, energy, solar and agricultural.

Prior to the merger, Robbins & Myers Inc. was a leading supplier of engineered equipment and systems for critical applications in global energy, industrial, chemical and pharmaceutical markets. Included in the acquisition and now falling under the new NOV Mono organization are the following business units:

- Springfield, Ohio-based *Moyno Inc.*, manufacturer of progressing cavity pumps, sludge pumps, metering pumps, sanitary pumps, mag-drive pumps, multiphase fluids transfer systems and grinders.
- Dayton, Ohio-based *Chemineer Inc.*, provider of mixing technology and manufacturer of quality equipment for fluid agitation applications.
- Claremore, Okla.-based *Tarby Inc.*, manufacturer of a line of progressing cavity replacement parts and pumps.

NOV Mono will also include product lines under the previous NOV

Monoflo brand identity.

Since the merger was formally announced, the two companies have been executing a comprehensive integration plan designed to rapidly combine the operations of the two companies, their subsidiaries and their product lines into one organization.

NOV Mono Senior Vice President Santosh Mathilakath, who will lead the new company, said the combination of these strong businesses represents a new force in the industrial pump arena, building on each company's rich history and unique market strengths to provide customers with unparalleled breadth and depth of solutions and services.

"The combination of these businesses creates a platform for significant growth for NOV Mono," said Mathilakath. "Our truly global footprint, combined engineering strength, larger market channels, enhanced manufacturing and broadened supply chain capabilities will enable NOV Mono to rapidly create enhanced value propositions for customers, realize manufacturing and supply chain efficiencies, decrease response time, and provide a superior customer experience."
